b
Time-outs follow the lick count:
> 0.5 x wait in 100% of time-out waits, never in the wait before a square; my count = rig count +-1 in 99.7%
ended in time-out (n=242)
ended in square (n=119)
licks the rig counted in the wait
limit 0.5 x wait
wait drawn (s)
c
No ramp towards the wait end
wait ends in time-out
wait ends in square
lick rate (Hz)
time before the end of the wait (s)
d
Licking around the square
hit (58)
miss, level 2 (pump +1.5 s) (35)
miss, level 3: no pump (26)
lick rate (Hz)
time from square onset (s)
e
Lick bouts per class
119 trials, 58 hits (level 2: 40%, level 3: 57%)
early wait
antic. -> time-out
antic. -> square
