11-06 1555 (177)
11-06 1604 (159)
b Tonic visibility of the confirmed axons
accepted
not accepted
nothing visible
background 95th pct
axon-scale contrast of the mean image at the footprint (robust z
c Stable core + sporadic axons
observed
random subsets, same rates
axons (in view of all)
in how many of the 9 November sessions the axon was accepted
d Carry-over of accepted axons
P(accepted in t | accepted in s, in view)
chance
days between the two sessions (11-04..11-06 block)
e Recall vs recording length (Nov block)
recall of confirmed axons
recording length (min, log)
